PROFILE SUMMARY

Software Developer with hands-on experience in backend and full stack development using Python, JavaScript, React.js, Node.js, FastAPI, REST APIs, and SQL/NoSQL databases, including practical LLM API integration for AI-driven product features. Strong foundation in System Design, problem solving, debugging, and API development. Seeking an entry-level Software Developer role to design, build, and contribute to scalable, production ready software solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript
Backend Development: Node.js, Express.js, FastAPI, Flask, REST API Development, JWT Authentication
Frontend Development: React.js, Redux Toolkit, Tailwind CSS, HTML, CSS, Responsive Web Design
AI & LLM Integration: LLM API Integration (OpenRouter), Prompt Engineering, Conversational AI Design
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Redis, Firebase, Supabase
Tools & Cloud: Docker, AWS, Git, GitHub, CI/CD

INTERNSHIP

Analyst Intern — Concentrix *July 2025 – Jan 2026*

- Analyzed operational data and generated reports to support business decision making using data driven insights.
- Collaborated with CRM and internal business applications to monitor workflows, resolve issues, and maintain data accuracy.
- Applied process optimization and stakeholder communication techniques to improve operational efficiency.

Data Science Intern — PLACEMANTRA *Jan 2025 – Mar 2025*

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Python, Pandas, and NumPy on large datasets.
- Developed and evaluated machine learning models to identify patterns and generate actionable insights.

PROJECTS

DPI Network Analyzer | Python, Scapy, FastAPI, Redis, Pydivert, TLS, TCP/IP *GitHub*

- A real-time network monitoring system to capture and analyze IPv4/IPv6 traffic and extract TLS SNI hostnames using packet parsing and flow reassembly.
- Designed and developed FastAPI REST APIs with a Redis-backed policy engine for real-time flow tracking, domain blocklist management, and event monitoring.
- Implemented domain-based traffic control using TCP RST injection with QUIC/HTTP3 support and a live monitoring dashboard.

InterviewIQ.AI — AI-Powered Mock Interview Platform | React.js, Node.js, Express.js, MongoDB, Firebase Auth, Razorpay *Live Demo | GitHub*

- Built a full-stack AI interview preparation platform that parses a candidate's resume into structured data and dynamically generates adaptive, role-specific interview questions via LLM API integration (OpenRouter).
- Designed a real-time conversational question engine where the AI chooses between a follow-up or a new topic based on the candidate's previous answer, with Web Speech API powering voice-based Q&A.
- Implemented a credit-based monetization system with Razorpay payment gateway integration, automated credit refill logic, and MongoDB-backed interview scoring and performance reports.

Ledgerly — Auto Expense Tracker from SMS/Email | React.js, Node.js, Express.js, MongoDB *Live Demo | GitHub*

- Built a regex-based parsing engine that extracts transaction data from real bank/UPI SMS and email formats, auto-categorizing each transaction via a rule-based engine that learns from user corrections.
- Designed a merchant-grouping algorithm using amount-consistency and charge-interval analysis to automatically detect recurring subscriptions, alongside per-category budget tracking with live overspend alerts.
- Implemented MongoDB aggregation pipelines powering a full-stack dashboard for monthly spending trends and category-wise breakdowns, deployed end-to-end on Render and Vercel.

EDUCATION

Master of Computer Applications (MCA) — Chandigarh University | CGPA: 7.5 *2024 – 2026*

Bachelor of Science (B.Sc.) — Smt. Indra Mani Mandalia Shiksha Niket, BITS-Pilani | CGPA: 6.8 *2020 – 2024*

CERTIFICATIONS

- Python for Machine Learning
- React — Frontend Development
